SUBJECT: HEALTH RISK ASSESSMENT - LASSO IN PRIVATE WELL

Attached please find several laboratory report sheets reporting on analyses from the **NON-** well in Dakota County. Please advise us and the well's owner of the health implications of the detected contamination.

This contamination appears to originate from the disposal practice of a nearby grain mill. The mill is a distributor and bulk applicator of lasso. The tank rinsate has, for many years, been indiscriminately drained on the ground.

I will be conducting additional sampling in the area in the near future. Due to laboratory difficulties with these **NON-** samples I have not been able to provide the results to the anxious parties. Please address a reply to this well contamination to:

**NO**  
**NON-**  
**RESPON**
